

Transalis NextGen EDI Global Managed Services

The powerful **Transalis Quantum™** data engine drives traditional EDI and next generation EDI, enabling digital business-critical supply chain optimisation by connecting trading partners across 32 countries worldwide, with 10,000 users exchanging 40m documents per annum, with a £3bn per annum invoice value, securely exchanging over 100k documents every day.

Managing disruption requires supply chains to foster innovation to implement and scale digital supply chains. As a supply chain leader, you must redefine what your supply chain can do in a disruptive, digital world to maximise your competitive advantage.

Transalis is a GS1 Certified EDI Solution Provider

- Transalis Quantum™
- 32 Countries
- 10,000 Users
- 40m docs per annum
- £3bn invoices per annum
- 100K docs per day
- 100% digital
- 100% connected

Staying competitive in a disruptive business environment requires a new kind of supply chain focused on agility, flexibility and responsiveness. That means having the right technologies and capabilities, to master digital technologies and embed them in digital supply chains.
